--	----------------------------	---	--

Training objective

Master the trade of prescription-glasses mounting and repair technician through a 100% practical 5-day training on real equipment, and earn a certified professional diploma.

Training modules

1

Fundamentals

Frame and lens components, and materials used in optics.

2

Prescription reading & analysis

Lens types: CR39, progressive, photochromic, and reading the prescription.

3

Work preparation

Matching lenses to client needs and choosing the frame.

4

Practical application

Using the edger machine, mounting lenses and adjusting measurements and angles.

5

Maintenance & projects

Maintenance, complete assembly, final assessment and diploma.

Target audience

Vocational-training graduates, entrepreneurs, career-changers, artisans and optical-shop employees.

Methodology

Intensive 5-day training (3 theory + 2 practice) on real equipment, with workshops and hands-on situations.

Certification

Training Attestation issued by the Digital Services Company – TKAWEN, digitally secured and verifiable online through a unique QR Code.
